

Jackson Nolan

832-928-4339 | jacksonknolan@gmail.com | <https://github.com/JacksonkNolan> | Tomball, TX

Summary

Computer Science student at Texas Tech focusing on **Software Engineering** and **Cybersecurity**. Proven track record in full-stack development (**Python, Java, C++**) and managing technology for 500+ users.

Education

Texas Tech University | Lubbock

Computer Science | GPA: 3.3 | 12/2026

Relevant Coursework: Data Structures & Algorithms, Computer Architecture, Assembly Language, Theory of Automata, Object Oriented Programming, Networking, Design/Analysis of Algorithms.

Experience

Texas Tech University | Lubbock, TX

Student Technology Assistant | 08/2025 - Present

- Resolve 10-15 daily technical issues for a user base of 500+ faculty and students on Windows and Mac platforms.
- Maintain hardware, software, and network connectivity, ensuring 99%+ uptime for critical classroom technology.
- Utilized PowerShell and Shell scripting to automate routine diagnostic tasks and system reports.

Chick-fil-A | Lubbock, TX

FOH Team Member | 08/2024 - Present

- Facilitate high-volume service efficiency through effective communication and team-oriented problem solving.

City Bank | Lubbock, TX

IT Intern

- Collaborated on enterprise IT infrastructure and financial technology systems within a high-security environment.
- Assisted in monitoring network integrity and ensuring system compliance with federal financial regulations.
- Documented system configurations and supported the deployment of enterprise-wide software updates.

Professional Projects

Pipeline-Sentinel (ICS Cybersecurity) |

- Developed a Python-based Industrial Control Systems (ICS) honeypot to detect unauthorized Modbus protocol injections.
- Applied cybersecurity principles to protect hardware-software interfaces similar to those used in defense systems.

Audit-Tracker (Fintech/Compliance) |

- Built a web-based dashboard using **HTML, CSS, and JavaScript** for managing audit workflows and remediation.
- Implemented an **Object-Oriented** user-role system to ensure accountability and data integrity in financial audits.

DFA-Based Log Scanner |

- Engineered a visualizer in **C++** using Deterministic Finite Automata (DFA) to identify patterns in system logs.

Skills & Certifications

- **Certifications:** Amazon Junior Software Developer with GenAI
- **Languages:** Python, Java, C#, C++, C, SQL, .NET, PowerShell, MATLAB, HTML/JavaScript
- **Tools/Methods:** Git/GitHub, Agile Development, Linux/Unix Shell, Unit Testing

Involvement

- Texas Tech Rowing Team (Founding VP)

- BYX Fraternity Recruitment Chair
- Foundation Retreat Team Lead
